

KEISER STRENGTH

A350 BIAXIAL CHEST PRESS

Model 1335

UPPER BODY MACHINES

DELIVERING BALANCED RESULTS

To maximize your range of motion, we start you with a wide grip when your hands are even with your chest. As you move through the range of motion, your hands converge to complete the work on your chest and arms. The independent movement of the exercise arms prevents your stronger side from helping your weaker side, thus maximizing your results.

KEISER DYNAMIC VARIABLE RESISTANCE

Keiser's **Dynamic Variable Resistance** is designed to provide a smooth consistent Variable Resistance force curve at any training speed. Each machine has its own unique Variable Resistance curve designed and tuned perfectly for the muscles being used in that particular exercise. For users, this means that working out any speed, you'll always be training at maximum efficiency.
